

Nelson Waldorf School Tuition and Fees 2010/11

Maximum individual tuition for:

Kindergarten: \$ 3,300.00
Grade 1-8: \$ 5,875.00

**Sibling discount rates
 (percent of maximum paid)**
1st child (oldest) 100%
2nd child: 50%
3rd child: 33%
4th child: 25%

	Total Tuition	# Children in Kindergarten		
		0	1	2
# Children in Grades	0		\$ 3,300.00	\$ 4,950.00
	1	\$ 5,875.00	\$ 7,525.00	\$ 8,614.00
	2	\$ 8,812.50	\$ 9,901.50	\$10,726.50
	3	\$10,751.25	\$11,576.25	
	4	\$12,220.00		

Tuition per family is the smaller of the number in the table and 11% of net income (Canada Revenue Notice of Assessment, Line 236, household total)

Example: Family with 1 child in Class 5, 1 child in Class 2, and 1 child in Kindergarten.

Total tuition from table above is \$9,901.50, calculated as follows:

1st child (5):	100% x	\$ 5,875.00	= \$5,875.00
2nd child (2):	50% x	\$ 5,875.00	= \$2,937.50
3rd child (K):	33% x	\$ 3,300.00	= \$1,089.00
Total:			<u>= \$9,901.50</u>

But if, say, the net income on line 236 of the Notice of Assessment for one adult in this family is \$21,000 and for their partner it is \$9,000, then the total tuition will only be \$30,000 multiplied by 11%, which comes to \$3,300.

**Foreign Student Fee: \$4600 in addition to tuition fees above
 (represents provincial funding for Canadian resident students)**

Supply Fees: **Kindergarten: \$ 250**
(per child) **Grades 1-5: \$ 350**
 Grades 6-8: \$ 475

5% early payment discount if tuition/fees paid by June 14, 2010

The graphs on the next page show how tuition varies according to family net income. Find the graph for the number of children in Kindergarten and Grade 1-8, find net income along the bottom of the graph, and read off total tuition on the left-hand side of the graph. If net income places you on the sloped part of the line, you'll pay 11% of your net income. If net income places you on the flat part of the line, you'll pay the tuition number shown (obtained from the table above). For the example family above, we'd look at the graph labelled "1 Kindergarten, 2 Grade 1-8." Since the net income of \$30,000 places this family on the sloped part of the line, this family pays 11% of \$30,000, or \$3,300. They would have to have a net income above \$90,000 to be on the flat part of the line and paying the full tuition of \$9,901.50.
